I am a first year PhD candidate by Universität des Saarlandes, and a researcher at the Relational Machine Learning Lab at the CISPA Helmholtz Center for Information Security, advised by Rebekka Burkholz.

In the past, I have enjoyed complexity theory (P vs. NP), mathematical music theory (the twelve-tone system) and functional programming (Haskell diagrams). I have been a mathematical olympian and organizer at EGMO, a competitive programmer at SWERC, a LaTeX package developer, and a Baroque recorder player.
